

Dear FCC, I'm writing in regards to the new LPFM broadcast service. My Family and I currently listen to Air1 in Boise, ID on 98.7 FM which is a translator service. We do not have any Christian radio station in the area that play the format they do, and the service is very much appreciated. The Air1 music service and programming is very important to us and would be a huge loss to our community if not allowed to continue it's translation service. It is in the public interest to allow the translation service to continue as a priority over the proposed LPFM service. Please consider this letter and comments in support of not allowing LPFM to displace or have a priority over the existing translator services such as Air1 98.7 FM. Thank you for your time, Todd Farrell
